

NOTICE OF STUDY COMMENCEMENT

MUNICIPAL CLASS ENVIRONMENTAL ASSESSMENT MAXVILLE LAGOON EXPANSION

NORTH
GLENGARRY
NORD

The Township of North Glengarry owns and operates the Maxville Lagoon which treats all wastewater collected in the Village of Maxville. The flows generated within the collection system have increased and are approached the rated capacity of the Lagoons. The Township is initiating the environmental assessment process to determine the preferred solution to providing an increased capacity to the Village of Maxville

The project is being planned following the Schedule C process in the Municipal Class Environmental Assessment 2024.

A Public Consultation Centre has been arranged to review and receive input from the public about the alternate solutions, and the preliminary identification of a Preferred Solution. The format of the Public Consultation Centre will be an informal open house held at the Community Hall at the Maxville Arena 34 Fair Street:

Date: March 3rd, 2026 **Time:** 4:00pm to 6:00pm

If you are not available to attend the Public Consultation Centre you may request a PDF copy of the presentation boards from Timothy Wright, Director of Public Works, Township of North Glengarry.

STUDY CONTACTS

All those with an interest in the study are urged to attend. If you have any questions or wish to be added to the study mailing list, please contact:
